REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The Campbell reference (3,760,809) discloses a slide frame having an inverted U-shaped slot formed on a side thereof (as shown in page 4 of the Office action mailed on 5/3/07) but is silent with regards to the actuator button **60** comprising a pin that is received within the slot since the actuator button is integrally formed with the slide frame. Campbell also fails to teach a spring means for resilient urging the slide frame toward the activating position or wherein the actuator button is slidable transverse to the bottom surface of the body (the actuator button movable downwardly) since the actuator button is integrally formed with the slide frame and that the slide frame moves parallel to the bottom surface of the body. This type of arrangement teaches away from having a spring means biasing the slide frame towards the activating position. The reference also fails to teach the actuator button comprising a pair of legs extending downwardly therefrom since the elements 63 and 61 are being interpreted as the "slide frame", which is a different structure recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
